Variant Submission Portal

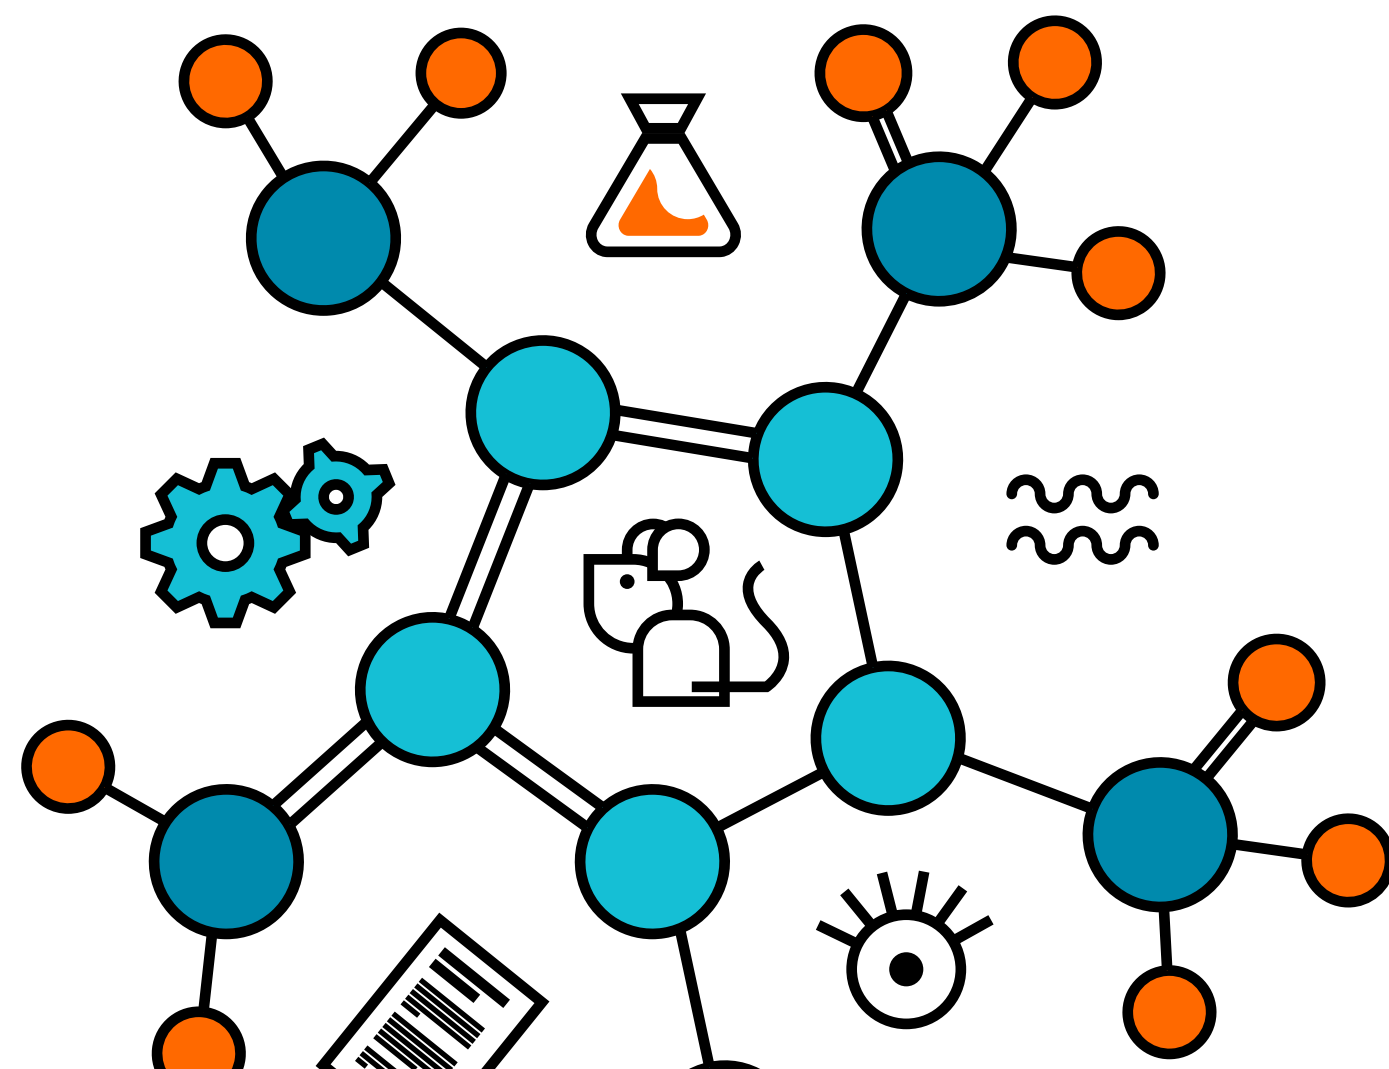

*Calling clinicians and researchers working on rare disease:
Do you have a VUS that you want to investigate further?*

Deadline for submission 31st December 2025

Working closely with clinicians and researchers who submit Variants of Uncertain Significance via our portal, the Congenital Anomalies Cluster will create precisely engineered mouse models of patient variants to:

1. Help clinicians establish genetic diagnoses.
2. Drive increased understanding of the molecular and cellular mechanisms underlying congenital anomalies.

For more information on how to submit a VUS, scan the QR code, or email stephen.twigg@imm.ox.ac.uk
